Sales Performance Across Price Tiers by Category

Price Tier	Category			
	American	Asian	Italian	Mexican
Premium (\$15-20)		24,541	40,531	
Mid (\$10-15)	18,687	17,235	8,932	29,437
Budget (<\$10)	9,551	4,945		5,360

SALE PER MONTH

Weekdays drive the engine, but premium is where the margin lives.

Across all three months, weekday revenue consistently outpaced weekends by more than 2:1 — peaking at \$40,911 in March while weekend figures quietly declined from \$16k to \$13.7k.

The price tier breakdown explains why the business is still healthy despite that imbalance: Italian Premium (\$40,531) and Asian Premium (\$24,541) are carrying disproportionate revenue weight, while Budget tiers across all categories remain largely negligible.

Mexican Mid (\$29,437) is the quiet overachiever here — volume-driven, consistent, and worth a closer look for upsell potential. The takeaway is simple: this isn't a volume business pretending to be one, it's a premium business that hasn't fully committed to acting like one yet.

Customer Demand by Category Across Days

Category	Day Name						
	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Asian	503	597	475	441	496	509	449
American	378	436	392	363	405	388	372
Italian	428	486	452	357	400	426	399
Mexican	450	469	441	361	366	479	379

Menu Item Performance by Category

Hamburger Item Id : 101 Total number of time Ordered : 622	French Fries Item Id : 106 Total number of time Ordered : 571	Mac & Cheese Item Id : 105 Total number of time Ordered : 463	Steak Torta Item Id : 120 Total number of time Ordered : 489	Chips & Salsa Item Id : 122 Total number of time Ordered : 461
Cheeseburger Item Id : 102 Total number of time Ordered : 583			Chicken Burrito Item Id : 117 Total number of time Ordered : 455	Chicken Torta Item Id : 119 Total number of time Ordered : 379
Edamame Item Id : 113 Total number of time Ordered : 620	Tofu Pad Thai Item Id : 108 Total number of time Ordered : 562	Orange Chicken Item Id : 107 Total number of time Ordered : 456	Spaghetti & Meatballs Item Id : 125 Total number of time Ordered : 470	Eggplant Parmesan Item Id : 132 Total number of time Ordered : 420
Korean Beef Bowl Item Id : 109 Total number of time Ordered : 588				

The visualization shows that Mexican items such as Steak Torta, Chips & Salsa, and Chicken Burrito dominate the top-performing segment, indicating strong customer demand within this category. Similarly, Italian dishes like Spaghetti & Meatballs and Eggplant Parmesan also contribute significantly, reinforcing their position as high-value offerings.

Menu Item Least Performance by Category

Cheese Quesadillas Item Id: 121 Total number of time ordered : 233	Steak Tacos Item Id: 116 Total number of time ordered : 214	Cheese Lasagna Item Id: 128 Total number of time ordered : 207	Potstickers Item Id: 114 Total number of time ordered : 205
Chicken Tacos Item Id: 115 Total number of time ordered : 123			

Revenue index

above 1 means a good day, below 1 means a slow day, compared to the restaurant's normal daily average.

Day Name	Revenue Index
Sunday	1.0211
Monday	1.1434
Tuesday	1.0268
Wednesday	0.8750
Thursday	0.9605
Friday	1.0423
Saturday	0.9308

Category Performance

Italian Premium — \$40,531 → undisputed king
Asian Premium — \$24,541 → strong and consistent
Mexican Mid — \$29,437 → volume workhorse
American — performs mid-tier only, no premium presence
Budget tier across all — barely moves the needle

Day of Week Demand

Monday is the single strongest day across all categories
Wednesday is the consistent weak spot
Friday recovers well — second best day overall
Weekends underperform despite more casual dining opportunity

What To KEEP On The Menu

Steak Torta Top ordered Mexican item, strong revenue
Chips & Salsa High volume, low cost, good margin
Chicken Burrito Consistent performer across all days
Spaghetti & Meatballs Italian anchor, premium price accepted
Eggplant Parmesan Solid Italian mid-premium performer
Hamburger American category leader by volume
Korean Beef Bowl Asian mid-tier, loyal repeat orders

What To REMOVE From The Menu

Chicken Tacos Only 123 orders in 3 months — worst performer
Potstickers 205 orders — below acceptable category average
Orange Chicken Low revenue, competes with better Asian items

The restaurant has a **strong, profitable core** — Italian Premium and Asian Premium are genuinely exceptional performers. The problem isn't the food, it's the **menu bloat, weekend neglect, and underpriced Mexican category** holding the ceiling down. Fix those three things with discipline over 90 days and **\$180,000–\$200,000 quarterly revenue is realistic** — a 12–25% uplift without adding a single new customer.
